There is a historical correlation in our nation between race/ethnicity and poverty. This relationship grew out of very real barriers to economic independence for people of color, such as the legal prohibitions to equal education, housing, employment, and land ownership. These barriers remain present today in children’s uneven access to quality education - including pre-school; healthcare; and the economic opportunities their families need to flourish. For more data on the status of children in your legislative district, visit KIDS COUNT Data Center: datacenter.kidscount.org
